Industry-specific intelligent fire management systemCustomer Problem Statement

I am	**A customer**	**I need a quality and creative fire management system with affordable price**
I am trying to	**Ensure the fire safety in my industry**	**I can avoid the fire explosion in my Industry and keep all my products safe from the fire spread this how reduce loss**
But	**I want to handle it easily**	**By doing this fire safety in the form of automation using recent technologies**
Because	**The fire explosion should be automatically detected without any human monitoring**	**The fire explosion at the ignition stage can be detected and controlled without human presence**
Which makes me feel	**That my Industry and my workers are safe**	**It saves the Industry and lives of the workers**
